About Me

I am a passionate MERN Stack Developer and Backend Engineer with strong DevOps capabilities.

I specialize in building scalable backend services, high-performance full-stack applications, AWS-based infrastructures, CI/CD automation, monitoring, and system design.

Tech Stack

Frontend: React.js, Next.js, Redux, Redux Toolkit

Backend: Node.js, Express.js, Redis, Sequelize, REST APIs, Authentication, Caching

Databases: MySQL, MongoDB

Cloud: AWS (EC2, Lambda, S3, CloudWatch, Route53, Load Balancer, SNS)

DevOps: Docker, Jenkins, GitHub Actions, GitLab, CI/CD, Linux

Monitoring: Prometheus, Grafana, CloudWatch, Winston Logging

Other Skills: System Design, Logging, Code Reviews, Scalable Architecture

Professional Summary

- 3+ years of hands-on experience with React.js, Next.js, Node.js, MySQL, and MongoDB.
- Strong backend expertise with Redis, Express.js, AWS Lambda, and GitHub Actions.
- Built scalable systems handling millions of users and automated deployments using Docker & AWS.

- Experience in monitoring, alerting, and performance optimization.

Work Experience

Nuclay Solutions Pvt. Ltd. – MERN Stack Developer (Oct 2023 – Present)

- Migrated the large-scale “Give Central” platform to Next.js & Node.js improving performance & scalability.
- Developed dynamic Donation System (Theme4, Theme5, Theme6).
- Set up AWS infra (EC2, S3, Lambda), achieving 99.9% uptime.
- Automated CI/CD pipelines using Docker & AWS, improving productivity by 20%.
- Integrated Redis caching reducing DB load by 40%.
- Added Winston logging with CloudWatch for real-time insights.
- Implemented SNS & Slack alerts reducing issue resolution time by 30%.
- Refactored legacy code reducing technical debt by 30%.

Religare Broking Ltd. – Software Engineer (Aug 2022 – Oct 2023)

- Built employee management & referral modules using React + Redux Toolkit.
- Developed secure REST APIs with Node.js & Express.js using OAuth 2.0.
- Used AWS S3 for PDFs and automated backend flows using Lambda.
- Wrote clean, maintainable, self-documenting code.

Projects

Ecommerce Platform + Admin Dashboard

- Full-stack ecommerce system with product management & secure payments.
- Deployed using EC2, S3, CloudFront, Route53; achieved 99.9% uptime.
- Implemented Lambda automation & CloudWatch monitoring.

Prometheus Monitoring & Alerting System

- Deployed Prometheus for real-time metrics scraping.
- Configured Alertmanager for CPU/Memory/Downtime alerts.
- Reduced incident response time by 50%.

Achievements & Certifications

- Certified MERN Developer – LearnCodeOnline
- Certified DevOps Engineer – CloudDevOpsHub
- Certified MongoDB Developer – MongoDB University
- Certified Java Developer – TutorialsPoint

Education

MCA – Lovely Professional University (2021–2023), 88.2%

BCA – VNSGU (2018–2021), 87.7%

Career Goals

- Become a high-level System Design Architect.
- Build distributed systems capable of handling millions of requests.
- Advance further into DevOps, cloud automation, and SRE practices.
- Create AI-driven tools & intelligent automation workflows.
- Continue building products that impact millions of users.

Additional Information for Chatbot Knowledge Base (RAG)

This document contains all known structured information about Nitish including tech stack, experience, goals, skills, achievements, and educational background. It can be used as a RAG knowledge source for building a personal chatbot/resume assistant in JavaScript.
